SAS Visual Analytics 1 for SAS® Viya: Basics

YVA1 : YVA152

This course provides an introduction to data discovery and report creation in SAS Visual Analytics. The e-learning course covers SAS Visual Analytics 2025.09 LTS in SAS Viya. Students with Visual Analytics 8.5 and other versions of SAS Viya can also take the course.

Learn How To

- Use SAS Visual Analytics for SAS Viya to:
- Get started building reports using SAS Visual Analytics.
- Access data loaded into CAS and navigate the SAS Visual Analytics interface.
- View reports using SAS Visual Analytics and other supported applications.
- Manage and work with multiple data sources, create data views, custom categories and hierarchies.
- Explore data and create reports using objects.
- Create calculated data items and aggregated measures.
- Analyze geographic data using geo maps.
- Design interactive reports by adding filters and ranks, work with multiple pages, prompts and actions.

Who Should Attend

Business analysts who need an introduction to the functionality provided by SAS Visual Analytics.

Prerequisites

- No SAS experience or programming experience is required, although you should have some computer experience. Specifically, you should be able to:
- Log on and off a computer and use a keyboard or mouse

SAS Viya Workbench for Learners

This free, on-demand compute environment empowers students and educators to build programming skills, develop AI and machine learning models, and complete projects quickly. With support for both SAS and Python, it offers the flexibility you need for academic success. For academic, noncommercial use only.

Students

Dedicated project space: Dive into a dedicated compute environment where your data science projects come to life. Whether you're a SAS enthusiast or a Python aficionado, you'll have the power to enhance your coding skills in your preferred programming language.

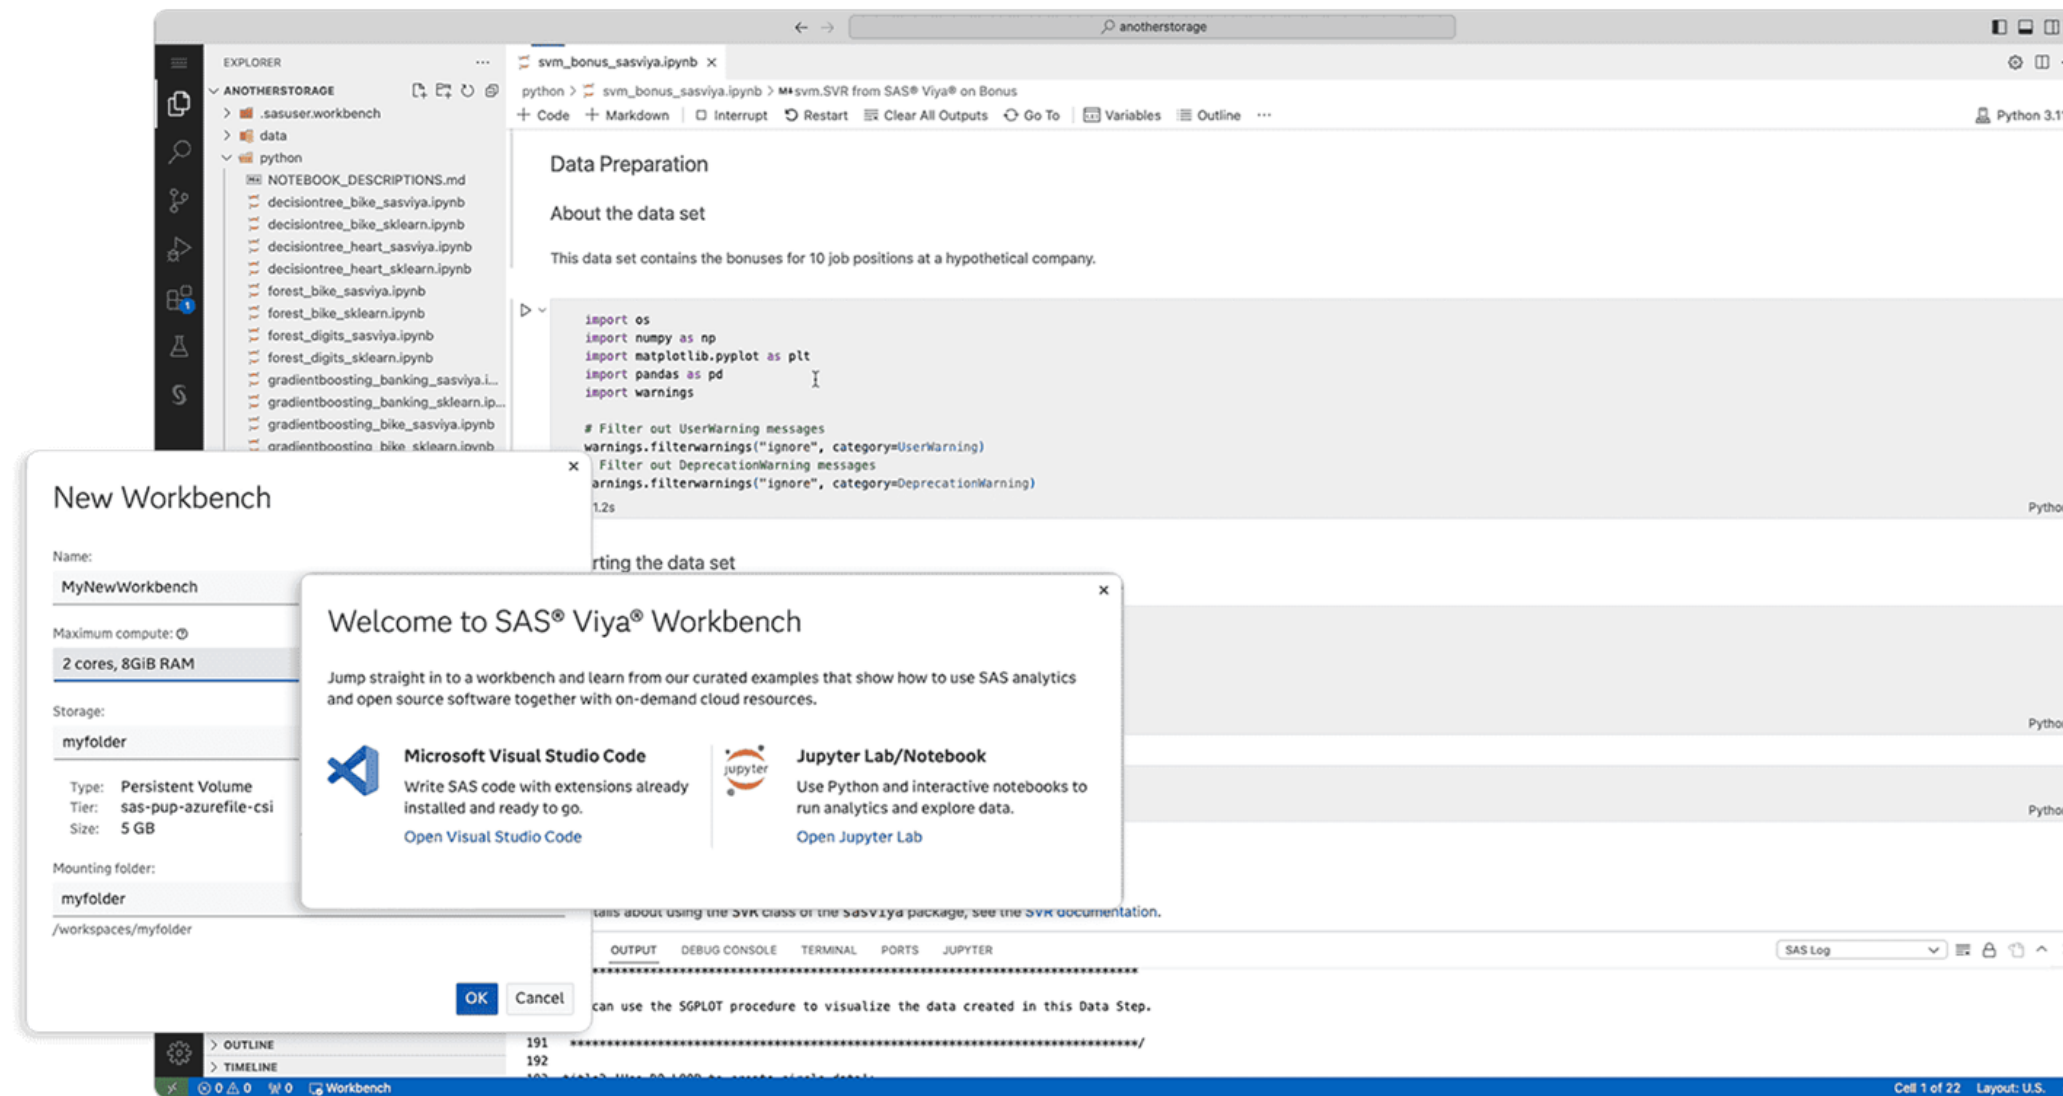

Seamless collaboration: Team up with classmates effortlessly using GitHub integration. Share code, collaborate on projects and learn from each other.

Future-proof your career: Become a multilingual coding expert and stand out in the job market. Master the versatile skills that industries crave, boosting your employability and preparing you for dynamic roles working alongside developers and data scientists using a variety of languages and tools.

SAS Viya Workbench for Learners

This free, on-demand compute environment empowers students and educators to build programming skills, develop AI and machine learning models, and complete projects quickly. With support for both SAS and Python, it offers the flexibility you need for academic success. For academic, noncommercial use only.

Educators

Multiple languages: Enable your students to explore multiple programming languages within a single, accessible coding environment. They can easily compare the strengths and outputs of SAS and Python side by side, fostering a deeper understanding of each language.

Equitable access: Our hosted platform ensures that all students have easy and free access to a standardized computing environment, eliminating disparities and promoting inclusivity in learning.

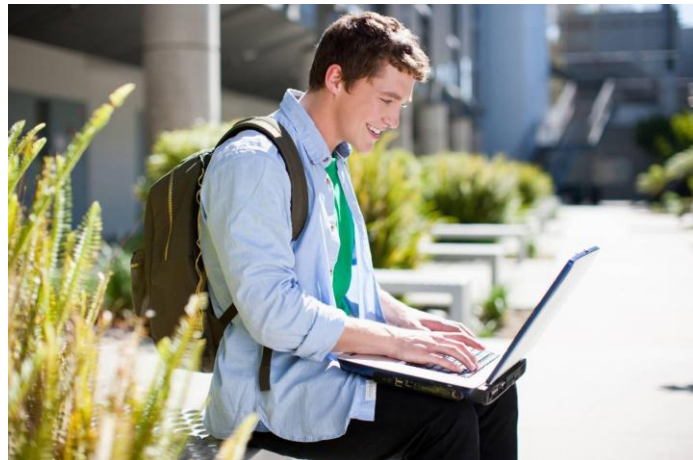

Industry-relevant skills: Prepare your students for the workforce by equipping them with multilanguage proficiency. This practical skill set aligns with the diverse expectations of today's technology-driven workplaces.

Robust integration: With the integration of Visual Studio Code and Jupyter Notebook/JupyterLab, you can provide a flexible platform for writing and executing code, enhancing your teaching effectiveness and student engagement.

Helpful Tips

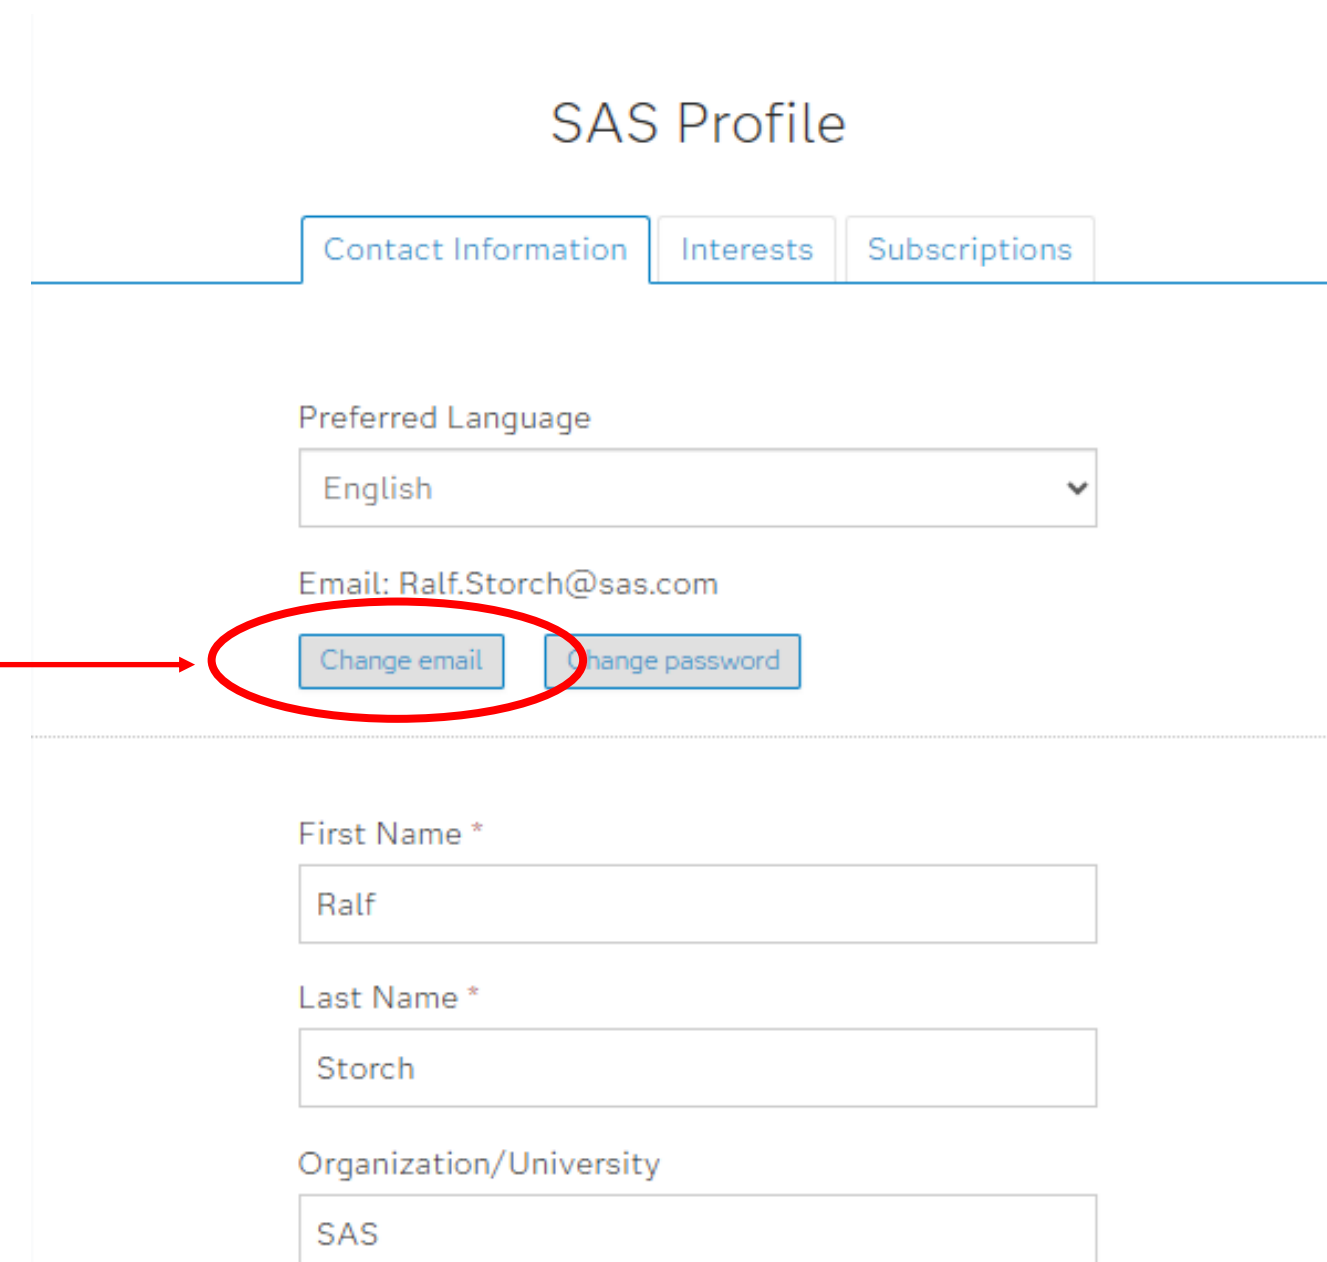

Change your E-Mail

If you did not use your University-Email and get no access to SAS Skill Builder

Access the following link:

<https://www.sas.com/profile/ui/auth.html#/edit>

Change E-Mail-Address

The screenshot shows the 'SAS Profile' page with three tabs: 'Contact Information', 'Interests', and 'Subscriptions'. The 'Contact Information' tab is active. It contains a 'Preferred Language' dropdown menu set to 'English'. Below this, the email address 'Email: Ralf.Storch@sas.com' is displayed. A red box highlights the 'Change email' button, and a red arrow points from the text 'Change E-Mail-Address' to it. The 'Change password' button is also visible. Below the email section, there are input fields for 'First Name *' (containing 'Ralf'), 'Last Name *' (containing 'Storch'), and 'Organization/University' (containing 'SAS').

IMPORTANT

Use the right access link to avoid to be registered as inactive and loosing content

Please note, if a user bookmarks the URL to access VFL or does not properly authenticate through the following links that direct a user to the launch page, the user may be deemed as inactive after a certain period of time (90 days) and their user account will be removed from the system along with any data associated with their user account. This may include, projects, code, uploaded files from Home Directory.

Inactive Viya for Learners (VFL) users:

- **Inactive VFL users** are defined as VFL users who have not accessed VFL via the VFL Launch Page (<https://learn.sas.com/vfl>) for more than (90) days.
- Some users have bookmarked and directly accessed their assigned VFL environment (example: <https://vfl-0xx.engage.sas.com/SASDrive/>), instead of launching it from the VFL Launch Page ... the system is unable to identify those users as being 'Active', so after (90) days, their account expires.

Active VFL users:

- VFL users are defined as '**Active**' when they launch/access VFL from the VFL Launch Page (<https://learn.sas.com/vfl>).
- **Each time** the user accesses VFL via the VFL Launch Page, they are considered '**Active**' from that **access date + (90) days**.

Helpful Tips

- Use Chrome, Firefox, or Safari to access SAS Viya for Learners.
- SAS Viya for Learners is a shared resource.
 - Longer Inactive accounts and files may be deleted to ensure maximum performance.
 - Users are limited to 5 GB of data in memory and 100 MB per uploaded data file.
- Autotuning is disabled in SAS Viya for Learners. The software will return an error when a user requests autotuning.
- SAS Viya for Learners may be unavailable every 3rd weekend of the month from Friday at 8pm ET to Sunday at 2pm US East Time while we apply enhancements.
- If you run into problems, then try to clear your browser cache, close the browser and restart the browser and log in again. Alternative: use another browser.

Problem handling

Chat or Email

Use the chat function at the bottom right of the screen, or send an email to academic@sas.com and describe the problem with screenshots.

If you have problems to access the SAS environment specify the server on which you work. You will find these information in your browser address field, e.g. <https://vfl-047.engage.sas.com/>. Replace 047 with your server number.

SAS® Skill Builder

You have 1 year access to the Skillbuilder, but you can extend it as long as you have an university email-address

Access the following link

<https://learn.sas.com/>

to check when the access will expire.
